EXPERIENCE

Equitable, Syracuse, NY *Foundational Data and Application Team — Angular Developer*

DECEMBER 2020 - MAY 2021

- Responsible for overseeing Equitable's first monorepo, housing all enterprise Angular applications
- Established a UI component library to share across the monorepo for consistent and rapid development
- Responsible for building new features in the monorepo, and reviewing all pull requests for individual applications
- Lead Angular training and provided documentation for junior developers to assist in the monorepo development

Equitable, Syracuse, NY *Programmer Analyst — Senior Manager*

OCTOBER 2018 - DECEMBER 2020

- Transitioned from full-stack Java development to Angular development role
- Built the first Equitable enterprise Angular application (Zeus) to support the internal Collections Team
- Created the base component library to use throughout the Zeus platform and future designs
- Worked with scrum master, back-end developers, and product owners to take business requirements from idea, to a Figma wireframe, and then to development

AXA, Syracuse, NY *Programmer Analyst — Manager*

AUGUST 2015 - OCTOBER 2018

- Responsible for the front-end (JSPs, HTML, CSS, JavaScript) and back-end (Java/J2EE) of AXA's Employer Plan Administration Center and Online Enrollment projects

AXA, Syracuse, NY *Programmer Analyst — Technology Associate*

MARCH 2014 - AUGUST 2015

- Supported front-end work items on the Online Enrollment scrum team
- Developed the first responsive online enrollment website for AXA-sponsored requirement plans
